

TECHNICAL SPECIFICATIONS

Model Specification	M-330	M-400
Maximum Weight Capacity	330 lbs	400 lbs
Maximum Lifting Height	64 1/4"	69 3/4"
Minimum Lifting Height	21 1/3"	23 1/2"
Internal Leg Open	40 1/4"	40 3/4"
Internal Leg Closed	24 1/2"	24 1/2"
Overall Length	44 3/4"	48 3/4"
Spreader Bar at Max Reach	41"	48 3/4"
Reach at Max Height	20 1/2"	22"
Reach at Min Height	16 1/2"	19 3/4"
Max Reach	28 3/4"	32"
Turning Radius	47 1/4"	51 1/4"
Legs Open – External Width	44"	45"
Legs Open – Internal Width	40 1/4"	41"
Legs Closed – External Width	28 1/3"	28 1/3"
Legs Closed – Internal Width	24 1/2"	24 1/2"
Overall Height of Legs	43 1/4"	43 3/4"
Ground Clearance	2"	2"
Front Twin Castors	4"	4"
Rear Braked Castors	4"	4"
Weights	M-330	M-400
Mast & Boom inc all fixings	33 lb.	41.9 lb.
Base Assembly	35.2 lb	39.7 lb.
Assembled Unit	72.7 lb.	86 lb.
Battery	4.4 lb.	4.4 lb.

(Dimensions in inches and weights in lbs)

M-330

M-400

Size	Height	Weight
Junior	<4'	<110 lbs
Small	4'-5'6"	95 lbs-150 lbs
Medium	5'-6'	125 lbs-250 lbs
Large	6'-7'	250 lbs-400 lbs
X-Large	6'-7'	400 lbs-480 lbs
XX-Large	>6.5'	>480 lbs

Prism Medical Slings

Slings are the most important component of any lift system as they are the interface between the client and the lift. Prism Medical offers a comprehensive range in a variety of designs and materials.

A customization service is offered to provide a unique client specific sling solution.

All Prism Medical slings have color coded bindings to indicate the sling size and unique color coded loops to ensure the sling is correctly positioned and connected to the lift.

The M-Series lifts are manufactured using durable steel construction which is easy to clean. The protective coating of the lift includes FREECOTE™ – our unique antimicrobial and antibacterial coating which is resistant against MRSA, e-coli, salmonella and listeria.

FREECOTE™ is an innovative coating which exploits the natural antimicrobial properties of silver. Silver is one of the oldest known antimicrobials and its effects are well documented.

Bacteria coming in contact with the FREECOTE™ surface are destroyed. Independent lab tests show that bacteria was reduced by 99.99% within 24 hours of coming in contact with FREECOTE™.

While most antimicrobial products have no control over the release rate of the active agent, FREECOTE™ works by 'release on demand'. Accelerated life testing has demonstrated that FREECOTE™ will remain active for the lifetime of the product.

WE'RE THE COMPANY THAT BRINGS YOU DWAYNE...

AND DWAYNE BRINGS YOU THE M-SERIES MOBILE LIFT

The M-Series is the result of years of experience in developing, manufacturing and supplying lifts, combined with the knowledge gained from working closely with the professionals and caregivers who use them.

Every aspect of the M-Series has been designed to make lifting and handling easier and safer. Its compact, ergonomic design makes it perfect for use in community or nursing environments.

PRISM MEDICAL

New ergonomically designed handset

Simple 4 button operation of the lift.

Diagrams on the handset further enhance ease of operation.

The handset can be conveniently positioned on any part of the lift frame when not needed.

New Six Point carry bar

The unique contoured 3 hook carry bar creates optimum space for the client and caregiver.

It accommodates most designs of slings and lifting requirements.

Ergonomically profiled push handles

Designed in conjunction with the REBA assessment tool.

Allows for the safe moving and positioning of the lift.

The control box is recessed within the handles to avoid accidental contact with the emergency stop button.

Actu-log

Available as an option—it records and displays the lift usage. It has the potential to increase the actuator lifespan.

Emergency lowering function

Is provided in the unlikely event of a power or control box failure.

Control box

Includes controls that can be used to operate the lift in the unlikely event of failure of the handset.

Emergency stop button

Situated on control box.

Push in to operate and rotate clockwise to reset.

On board charging

There is also the option of 'off board' charging of the battery pack which offers added flexibility.

Rear foot bar

Move the lifts over uneven floor surfaces and door thresholds.

Powered leg opening

Offers smooth, controlled leg opening to the desired position for a stable and safer lift without restricting access around chairs and beds. Built-in limit switches ensure lift components are protected during operation.

Heavy duty 4 inch castors

Makes the lift easy to maneuver on all surfaces.

'Bump guards' on the front castors to prevent damage and lockable castors on rear.
